

## KIESELMANN ANLAGENBAU

# Turning projects into success

Fully automated CIP system for tank and pipe cleaning.

Making it possible. We are your planning partner, installation team and commissioning engineers of successful process plant projects.

Individual support, expertise and the performance of our team are guarantees for optimal solutions. With us, your project is in good hands. From units to turn-key solutions for:

- > Yeast plants
- > Flash Pasteurizer
- > HGB-, CIP-Units
- > Wort aeration
- > Carbonation
- > Turn-key projects
- > Beverage-Inline-Mixer
- > Pigging Technology
- > Syrup blending
- > Water deaeration
- > Automation
- > After-sales service

Since 1973, we are partners of the beverage and food industry. We plan and build process plants with inventiveness, the utmost care and cutting-edge technology. From custom-fit designs to 3D-CAD visualisations up to a crowning control and automation technology, we manage to turn every project into a success.

### CONSULT, CONSTRUCT, COMPLETE

To optimally realise each project, we rely on an experienced team of graduate engineers, beverage technologists, food technologists, graduate brewmasters, supervisors and technical designers.

Flash pasteurizer: to ensure quality and shelf life before bottling and to interrupt fermentation for the production of non-alcoholic beverages.

New pressure tank cellar: from manual to automated control – in the cellar, the panel technology was replaced by double-seat valve manifolds.

### SUCCESS STORIES IN PICTURES

We offer you the right solution, no matter if it is an expansion, a conversion or a new design. Please scan the QR code on the left for photo-books of selected projects and more information.
